LEGAL DISCLAIMER

This whitepaper is to present Grokers Ai, a cryptocurrency built on BSC Blockchain, to potential community members willing to join the project in line with the proposed developmental journey. The information herein should not be construed to project a conclusive or exhaustive representation of the project or to imply any element of a contractual relationship. The whitepaper's sole purpose is to provide relevant and reasonable information to potential rokers Ai holders to enable them to make a reasonable decision before they undertake a thorough analysis of the company with the intent of participating, partnering, or investing in the project. The content of the whitepaper does not contain anything that should be deemed as a prospectus soliciting for investment. The document has been composed following, but not subject to, laws or regulations of any jurisdiction designed to protect investors, projects, and joint ventures

(1) Execution of the Company's vision and growth strategy, including concerning future M&A activity and global growth;
(2) Sources and availability of third-party financing for the Company's projects;
(3) Completion of the Company's projects that are currently underway, in development or otherwise under
(4) consideration;
(5) Renewal of the Company's current agreements;
(6) Future liquidity, working capital, and capital requirements. Forward-looking statements are provided to allow potential investors the opportunity to understand management's beliefs and opinions in respect of the future so that they may use such beliefs and opinions as one factor in evaluating an investment. Although forward-looking statements contained herein are based upon what project drivers of the Company believe, are reasonable assumptions, there can be no assurance that forward-looking statements will prove to be accurate, as actual results and future could differ materially from those anticipated insuch. ements.

ABOUT US

Grokers Ai initially run on the BSC Blockchainwith BEP-20 standard. Binance Smart Chain is a recent development that benefits its users with a rich and growingdigit asset like never seen before in the ecosystem

Grokers Ai is the cryptocurrency issued Binance Smart Chain by with the USDT BEP20 coin.

BSC uses a consensus mechanism called Proof of Staked Authority (PoSA), which combines aspects of Proof of Stake and Proof of Authority, allowing for a faster and more scalable network. BSC also supports the Ethereum Virtual Machine (EVM), meaning Ethereum-based applications can easily be migrated to BSC with minimal changes.

HOW IT WORKS

We work tirelessly to ensure every excruciating detail is refined to perfection.
Our experienced graphic design team works day and night to bring all our ideas to life and to build one of a kind gaming experience.

The number one priority of Project Grokers Ai will always be to carefully listen to the wishes of our community and to deliver a product that will make every investor proud.
Everyone who loves profits, that's why Grokers Ai token omics have been Specifically Engineered to bring profits to your Wallet in more than one way. The Reward feature automatically brings additional Tokens to your Wallet whilst you sit back and Relax. The Marketing Wallet ensures steady growth. And finally the Auto Liquidity feature brings Stability to the Price Floor.
Don't just read here, click on the links below and join us!

MISSION

❏ To make Grokers market place with Global Ai Reach.

❏ To build the best exchange underpinned by user-centric product, robust infrastructure and compliance to our regulators.

❏ To provide attention to the financial profits and safety of every single stakeholder.

❏ To facilitate the ability of buyer-seller to transact a wallet in the most secure way.

VISION

❑ To create a global Grokers Ai marketplace where buyers and sellers can buy, sell and trade Grokers Ai in most secured and trusted manner.

❑ To solve current problems of customers in a manner that make their business easier.

❑ To increase access to crypto assets. We believe that by increasing this access, we can help Indonesians take part in the exciting crypto innovation and improve their lives.
WORKING WITH BINANCE SMART CHAIN

working on content related to Binance Smart Chain (BSC) for a specific project, or are you looking to create general content around it? If you're focusing on creating educational content, tutorials, or even technical articles, I can help guide you through key topics or provide resources for deeper understanding. What exactly are you working on?

Working with Binance Smart Chain (BSC) content typically involves several key steps, whether you're building dApps, creating content, or educating others about the blockchain. Here's a general step-by-step guide you can follow for various types of BSC content creation:

www.grokers.io

BENEFITS OF BINANCE SMART CHAIN

Transactions on the Binance Blockchain technology at Very Less Cost. Binance does not impose a fee for asset transfers. It assists sellers and buyers through its free transactions, promotes, and provides the optimal business environment. Rapid transactions The network can handle up to 2000 transactions per second. Scalability and the potential to revolutionize online media are encouraged by such transactional capacity. This is a major accomplishment compared to Ethereum (25 transactions) or Bitcoin (3-6 transactions). Creates dApps On the network, you can create dApps. You can earn digital assets by creating a dApp on the network and offering content on it. These can be in regular Binance you created Binance backs that. As a result, you may be compensated for your efforts in your own dApps, you can still browse through the vast collection already created.

.
MAKING CRYPTOCURRENCY USEFULL

Cryptocurrency is a digital or virtual currency that uses cryptography for security. Unlike traditional money issued by governments (fiat currency), cryptocurrencies operate on decentralized networks based on blockchain technology. Here's a detailed breakdown of making cryptocurrency useful:

- Decentralization: Most cryptocurrencies operate on decentralized networks using blockchain technology, reducing the need for intermediaries like banks.
- Security: Transactions are secured through cryptographic techniques.
- Anonymity and Transparency: Users can transact without revealing personal information, while all transactions are recorded on a public ledger.

www.grokers.io

DECENTRALIZED

DeFi is a collective term for financial products and services that are accessible to anyone who can use Ethereum – anyone with an internet connection. With DeFi, the markets are always open and there are no centralized authorities who can block payments or deny you access to anything. Services that were previously slow and at risk of human error are automatic and safer now that they're handled by code that anyone can inspect and scrutinize.

- A global, open alternative to the current financial system.
- Products that let you borrow, save, invest, trade, and more.
- Based on open-source technology that anyone can program with.

www.grokers.io

SMART CONTRACT

A smart contract is a self-executing contract with the terms of the agreement directly written into code. It runs on a blockchain and automatically enforces and executes actions when predefined conditions are met, without intermediaries.

Key Features of Smart Contracts
1.Self-Executing: Once conditions are met, the contract executes automatically.
2.Tamper-Proof: Stored on a decentralized blockchain, making it immutable.
3.Trustless: Eliminates the need for intermediaries like banks or legal entities.
4.Transparency: Anyone can inspect the contract code and transactions.
5.Security: Protected by cryptography, reducing fraud risks.
ICO (Initial Coin Offering)

ICO stands for Initial Coin Offering. It is a fundraising method used by cryptocurrency and blockchain startups to raise capital by selling a new digital token to investors. Similar to an IPO (Initial Public Offering) in the stock market, an ICO allows companies to raise funds, but instead of shares, investors receive tokens that may have future utility or value.

They create a whitepaper that explains the project's purpose, technology, roadmap, tokenomics (token distribution), and fundraising goals.

Blockchain-based payment project that focuseson making reward as digital currency by improving the current reward points system in India, through Blockchain technology and tokenization. Although the reward points system is efficient in its current form, corporations have risks, a lack of transparency and security concerns with their centralized system for issuing and operating reward points. Groker Ai Airdrop Goals: . A fair, equal opportunity for many different people to get involved . Facilitate activity and capture a wider audience Airdrop recipients do not need to do anything to receive the Grokers Ai. Ignore any requests for your private key.

WHAT IS DEFI?

Decentralized finance (DeFi) is an emerging financial technology based on secure distributed ledgers similar to those used by cryptocurrencies. The system removes the control banks and Institutions on have money, financial products, and financial services.

Some of the key attractions of DeFi for many consumers are:

1. It eliminates the fees that banks and other financial companies charge for using their services.
2. You hold your money in a secure digital wallet instead of keeping it in a bank.
3. Anyone with an internet connection can use it without needing approval.
4. You can transfer funds in seconds and minutes

WHY IS DEFI IMPORTANT?

DeFi takes the basic premise of Grokers Ai— digital money — and expands on it, creating an entire digital alternative to Wall Street, but without all the associated costs (think office towers, trading floors, banker salaries). This has the potential to create more open, free, and fair financial markets that are accessible to anyone with an internet connection.
CRYPTO GAMING

NFT games are Play-to-Earn (P2E) games that give users more control over in-game assets. They make it possible as the in-game items are NFTs that you can buy, sell and trade with other players on the platform as per your wish.

Experts have made this possible by developing games on the blockchain platform. These games' in-game assets are NFTs with unique values and traits. This gives the owners of these items a lot of benefits. They are:

Immutability
As each in-game item you own is an NFT, it exists independently on the blockchain even if the game shuts down. Thus, regardless of what happens to the game, you can buy or sell your NFTs on the marketplace. Furthermore, new games can be made to utilise these NFTs. As NFTs are based on blockchain principles, the data inside them is unchangeable and tamper-proof.

Interoperability
In traditional games, your in-game assets are only usable within that game. You cannot use those in other games. NFT games change this situation with the help of blockchain technology. The in-game items of NFT games are interoperable. That is, you can easily use the in-game items of one game in another, provided they are built on the same blockchain.

WHY Gokers Ai

Transparency & Immutability

Lower Fees and Security

Transaction Traceability

Ease To Use

Safe & Secure

www.grokers.io

DISTRIBUTION OF TOKEN

Grokers Ai projects focus on tokens as a means to build network effects and help govern the network. The token sale is simply a bonus that can be used to facilitate distribution and raise money. it clearly states how many assets purchasers can get at each distribution stage. More details on how to design a token distribution block will be provided in the next section of the article. We are a sustainable and decentralized project that distributes wealth where it needs to be. Some % of each transaction is automatically sent to a charity picked by the community of Grokers Ai.
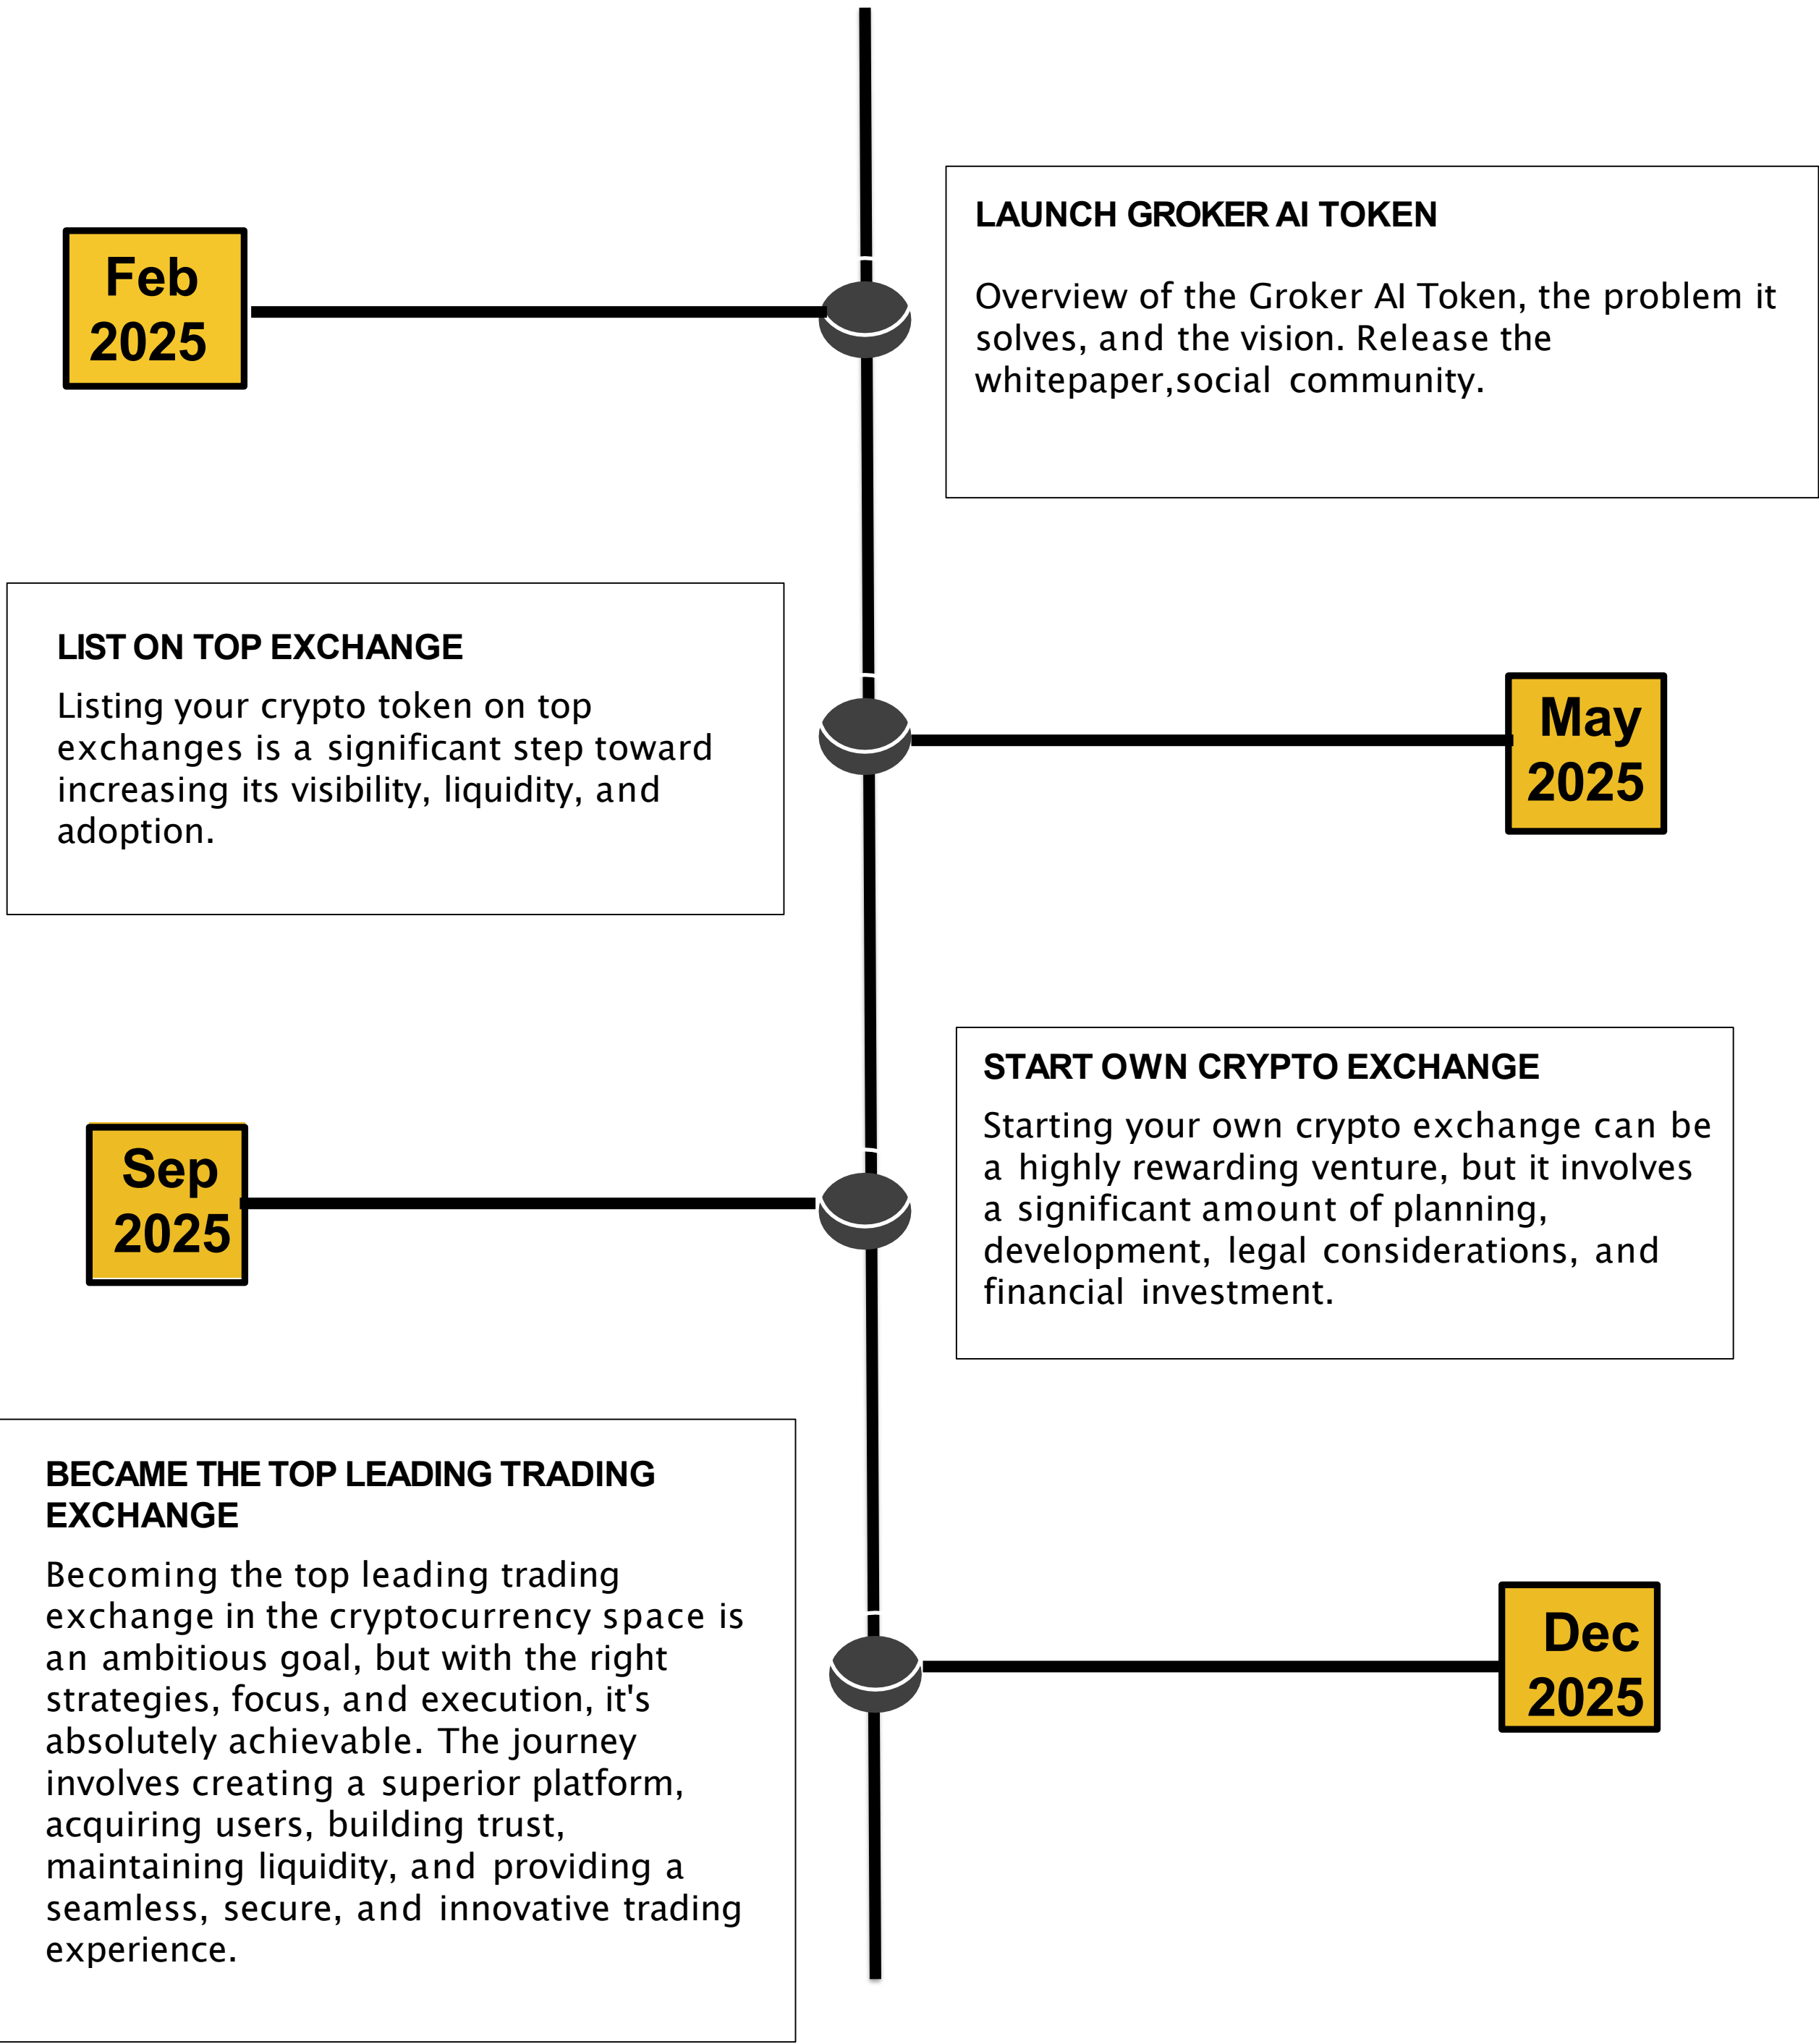

TOKEN DISTRIBUTION DETAIL

Total Supply - 1000000000

Presale	48%	4800000000
Liquidity Locked 2 years	9%	90000000
Staking Vested 16 weeks after launch	18%	180000000
Raging bull game rewards Vested 20 weeks after launch	17%	170000000
Community incentives/airdrop/burn	4%	40000000
Influencers Vested 20 weeks after launch	2%	20000000
Team Locked for 2 years	2%	20000000

www.grokers.io

PROOF OF STAKE

Seeing as cryptocurrencies are decentralized and not controlled by banks, they require a way to verify transactions. Proof of stake is a popular method (PoS). Proof of stake is a consensus mechanism for cryptocurrencies. By staking their coins, cryptocurrency owners can check new transactions and add them to the Blockchain. This method replaces proof of work, the first cryptocurrency consensus mechanism. Proof of stake has grown in popularity as concerns about the environmental impact of crypto mining have grown. Proof of stake is critical for cryptocurrency investors. These are some examples of cryptocurrencies that use it. Owners of a cryptocurrency can stake coins and create their own validator nodes using the proof-of- stake model. Staking is the act of pledging your coins to be used for transaction verification. They are locked while you stake your coins, but you can unstack them if you want to trade them. When a block of transactions is ready to be processed, the proof-ofstake protocol for the cryptocurrency selects a validator node to review the block. The validator verifies the accuracy of the block's transactions. If this is the case, they add the block to the Blockchain and receive cryptocurrency as a reward for their efforts. If a validator proposes adding a block with incorrect information, they will be penalized by losing some of their staked holdings

ROADMAP

Feb 2025

LAUNCH GROKER AI TOKEN

Overview of the Groker AI Token, the problem it solves, and the vision. Release the whitepaper, social community.

LIST ON TOP EXCHANGE

Listing your crypto token on top exchanges is a significant step toward increasing its visibility, liquidity, and adoption.

May 2025

START OWN CRYPTO EXCHANGE

Starting your own crypto exchange can be a highly rewarding venture, but it involves a significant amount of planning, development, legal considerations, and financial investment.

Sep 2025

BECAME THE TOP LEADING TRADING EXCHANGE

Becoming the top leading trading exchange in the cryptocurrency space is an ambitious goal, but with the right strategies, focus, and execution, it's absolutely achievable. The journey involves creating a superior platform, acquiring users, building trust, maintaining liquidity, and providing a seamless, secure, and innovative trading experience.
